

Scandinavian Woven Heart Basket

Print two copies of this page in contrasting colors. Next cut everything out along the solid lines and fold along dotted lines. You should now have six pieces of paper, each representing half a heart (enough to make three). Weave one of each color together, being careful to thread each loop through/around the other, (instead of just weaving back/forth). This will create a basket that can hold notes and/or treats.

Three large, rounded rectangular shapes, each divided vertically by a dotted line and containing two horizontal solid lines, representing the template for the woven heart basket pieces.
